EXPERIENCE

Affirma, LLC

Machine Learning Data Specialist

Nov 2021- Present

- Analyzed and used a wide range of methods to correct the predictions for a language based model for productivity applications. Collaborated using tools such as GitHub and VS Code and a wide variety of proprietary tools to enhance groundbreaking, innovative large language models.

AFI Tech Solutions

Front End Web Developer

Jan 2019 - Nov 2021

- Main developer responsible for building and maintaining a dynamic technology orientated website using the React framework and TailwindCSS.
- Interacted with the client personally and made sure everything was up to the clients satisfaction.

UPS

Freight Supervisor

Jan 2020 - Nov 2021

- Lead a team of individuals in a high paced, high-energy environment and used metrics to track and help provide my team with more efficient ways of productivity.
- Gained an immense amount of management and conflict resolution experience.
- Completed management and logistics training.

TEC Equipment

Inventory Manager/Front Counter Salesman

Jan 2014 - Jan 2020

- Maintained and managed a commercial sized inventory by implementing new procedures and dispatching warehouse runners. Daily activities included front counter part sales and all shipping duties required to maintain a healthy inventory.
- Helped customers daily with a wide range of issues.
